

Access Cabling and Communications is a leading telecommunications contractor in the San Francisco Bay Area, with over 25 years of experience serving the region. We have offices in San Mateo, San Jose, Livermore, Sacramento, and Los Angeles, allowing us to service all of Northern & Southern California. Our reputation as the best data cabling contractor in the area speaks for itself, so give us a call today and see for yourself.

Our company offers a range of cabling services for both copper and fiber optic systems, including installation and maintenance. We have expertise in the design and engineering of voice and data networks, using AutoCAD and other specialized software to create detailed plans and designs. We also have trained and certified staff in fiber optic installation, termination, and testing, using both multi mode and single mode fiber. Our services also include the installation and maintenance of all types of data systems, as well as network cabling audits and system management. We ensure that all of our work is up to industry standards, including panel cleanup, rework, and labeling, and provide as-built drawings and certification for our network cabling systems. We also offer reporting and testing services to ensure that our systems are functioning properly. In addition to these cabling services, we also offer power installation for modular furniture and service legs for specialty tools, as well as cabling and power systems for server rooms.

In addition to our cabling services, we also offer electrical services as a fully licensed electrical contractor. We understand the importance of proper testing and labeling of jacks and patch panels in ensuring the success of a voice or data network. That's why we take pride in our outstanding workmanship and complete all network cabling systems to standards that exceed industry standards.

Our list of services for commercial and small business clients includes:

- Install power for modular furniture. Cubical or Modular Office, & Desk systems
- Service legs for specialty tools and equipment
- Server room cabling and power system
- Design / Build Complete Power Systems
- T.I. Services to Contractors and Owners
